PEVA ANTISEPTIC H

Liquid hand cleanser for hygienic hand washes and hand decontamination.

Properties

PEVA ANTISEPTIC H is an alcohol-based washing solution with an excellent decontamination effect.

Composition

PEVA ANTISEPTIC H is a hygienic handwash and decontamination agent as defined in DIN EN 1499 (phase2/step2) and reduces bacteria by at least 3.5 log₁₀ steps.

PEVA ANTISEPTIC H is ideal for use in the foodstuffs industry, kitchens and hospital and care environments (always comply with hygiene plans).

PEVA ANTISEPTIC H cleans, decontaminates and deodourises the hands all at once.

The antimicrobial ingredients used in *PEVA ANTISEPTIC H* exhibit a wide range of action against gram-positive and gram-negative bacteria, fungi and yeasts. An external report has also confirmed the excellent protection provided against Hepatitis B viruses and HIV.

PEVA ANTISEPTIC H

PEVA ANTISEPTIC H achieves a remanent effect after repeated use, i.e. a long-term barrier effect is achieved between applications that inhibits bacteria reproduction and thereby cuts bacteria levels for protracted periods.

PEVA ANTISEPTIC H is free of colourings and preservatives.

PEVA ANTISEPTIC H has been dermatologically tested.

Application

Using no water, rub approx. 3 ml *PEVA ANTISEPTIC H* into your hands for at least 30 seconds (HBV, HIV one minute). Add a little water and wash your hands. Then rinse well. Let your hands dry naturally or use hygienic disposable hand towels.

Skin cleansing

Light soiling

Product description

Colourless to pale-yellow lotion, alcohol-based.
pH-value: 6.1 – 6.5
Density: 0.91 – 0.95 cm³ (20° C)

Statutory requirements

PEVA ANTISEPTIC H is subject to the German Cosmetics Ordinance (KVO) and the Foodstuffs and Commodities Act (LMBG). All cosmetics products in the *PEVA* range are manufactured in accordance with GMP (Good Manufacturing Practice) and are subject to microbial quality assurance checks.

Storage information

PEVA ANTISEPTIC H can be stored in closed original containers at room temperature for at least 24 months.

Skin care information

When working with noxious substances, a suitable skin protection agent should be applied before starting work (e.g. *PEVAPERM* general hand protection lotion). After finishing work, a suitable hand care agent should be rubbed into the skin regularly in order to aid regeneration (e.g. *PEVALIND* skin care lotion, rich in active ingredients).
