

PEVALIND

The high-grade
skin care lotion that is rich
in active ingredients

Properties

PEVALIND is a light fatty skin care lotion that is dispersed easily and is absorbed quickly.

PEVALIND invigorates by actively drawing upon the immune system of the healthy skin and boosts the regeneration of affected areas of the skin. This keeps the skin healthy, supple and well looked-after.

Composition

PEVALIND contains a highly effective system of skin-friendly, natural oils (sweet almond oil, peanut oil).

PEVALIND contains high-grade care substances, including:

- Natural α -bisabolol, an antiphlogistic substance consisting of camomile. This ingredient is effective against inflammation and harmful environmental influences.
- D-panthenol is a highly absorbent provitamin of pantothenic acid (vitamin B5). D-panthenol has an anti-inflammatory effect and aids wound healing, stimulates epithelialization, cell division and the growth of skin pigment.
- Keratin is a natural, high-grade protein that protects the skin. It keeps the skin moist and maintains elasticity.
- Natural vitamin E (α -tocopherol) has a highly active biological effect. It relieves the surface of the skin, reduces damage to the skin caused by free radicals and thus delays ageing of the skin.

PEVALIND

Using this product regularly strengthens the skin's natural UV defences. It boosts wound healing and reduces itching.

- Vitamin A increases the enzyme activity of the skin and increases epidermis, i.e. collagen. It also aids the regeneration of UV-damaged skin.
- Special moisturizers regulate the moisture in the skin and prevent the skin drying out.

These high-grade ingredients make *PEVALIND* an ideal skin care lotion of outstanding quality for all types of skin.

PEVALIND soothes and protects the skin and gives it a natural and healthy look.

PEVALIND is silicon-free.

PEVALIND is pH-neutral.

PEVALIND has been dermatologically tested.

PEVALIND is proven due to many years' use in practical application.

Application

Make sure your skin is clean and dry after completing work and then rub in *PEVALIND* thoroughly.

PEVALIND is suitable for all-over body use. Regular application is necessary to keep the skin healthy.

Product description

White to pale yellow oil-in-water emulsion, pleasantly scented or unscented
pH-value: 5.5 – 6.5
Density: 0.85 – 1.0 g/cm³ (20°C)

Statutory requirements

PEVALIND is subject to the German Cosmetics Ordinance (KVO) and the Foodstuffs and Commodities Act (LMBG). All cosmetics products in the **PEVA** range are manufactured in accordance with GMP (Good Manufacturing Practice) and are subject to microbial quality assurance checks.

Storage information

PEVALIND can be stored in closed original containers at room temperature for at least 24 months.

Skin care information

When working with noxious substances is unavoidable, a suitable skin protection agent should be applied before starting work (e.g. **PEVAPERM** universal skin protection lotion). Depending on the type of soiling, a suitable hand cleansing agent should be applied (e.g. **PEVASTAR** for medium to heavy soiling or **PEVALIN SPEZIAL** for extreme soiling). After finishing work, a suitable hand care agent should be rubbed into the skin regularly in order to aid regeneration (e.g. **PEVALIND** skin care lotion, rich in active ingredients).

Package sizes

- 100 ml tube with flip top
- 100 ml bottle
- 0.5 l dispenser bottle
- 1 l bottle
- 2 l soft bottle
- 2.2 l cartridge
- 5 l canister
- 10 l canister
