

Skin cleansing

Light soiling

PEVASAN HRL

The high-grade, gentle **skin cleansing lotion** with enhanced refatting.

Properties

PEVASAN HRL is very gentle and ideally suited to sensitive skin on account of its soothing ingredients, such as “sugar surfactants”. The high content of glycerine derivatives enhances the refatting effect on the skin.

PEVASAN HRL is soap-free and suitable for cleansing body and hair.

PEVASAN HRL has a wide range of applications, e.g. in offices, administrative environments, doctor’s surgeries, medical wards, and the food-processing industry.

Composition

PEVASAN HRL is based on renewable raw materials that are dermatologically and toxicologically safe.

PEVASAN HRL contains a complex, synergetic surfactant system featuring sugar surfactants that removes soiling while being kind on the skin. The surfactants are biodegradable and fulfil the requirements of the OECD screening test.

PEVASAN HRL

PEVASAN HRL contains a large quantity of a balanced revitalizing system that uses glycerine derivatives and skin-friendly care substances to prevent defatting of the skin, particularly with frequent washing.

PEVASAN HRL is a pearlescent skin cleansing lotion with a pleasant scent.

PEVASAN HRL is silicon-free.

PEVASAN HRL has been adjusted to the physiological pH value of the skin’s hydrolipid layer.

PEVASAN HRL has been dermatologically tested.

PEVASAN HRL is proven due to many years’ use in practical application.

Application

Make sure your skin or hair is moist before rubbing in *PEVASAN HRL*. Then rinse with water and dry.

- Skin protection
- Skin cleansing
- Skin care

Skin cleansing

Light soiling

Product description

Blue, pearlescent, slightly viscous suspension, pleasantly scented and unscented.
pH-value: Approx. 6.2
Density: Approx. 1.04 g/cm³ (20° C)

Statutory requirements

PEVASAN HRL is subject to the German Cosmetics Ordinance (KVO) and the Foodstuffs and Commodities Act (LMBG). All cosmetics products in the *PEVA* range are manufactured in accordance with GMP (Good Manufacturing Practice) and are subject to microbial quality assurance check.

Storage information

PEVASAN HRL can be stored in closed original containers at room temperature for at least 24 months.

Skin care information

When working with noxious substances, a suitable skin protection agent should be applied before starting work (e.g. *PEVAPERIM* universal skin protection lotion). After finishing work, a suitable hand care agent should be rubbed into the skin regularly in order to aid regeneration (e.g. *PEVALIND* skin care lotion, rich in active ingredients).
