

Skin cleansing

Heavy soiling

PEVASTAR

The concentrated
hand cleansing paste
with double effect.

Properties

PEVASTAR cleanses the skin deep into the pores and offers lasting skin protection and excellent refatting.

PEVASTAR is a soft paste and therefore compatible with many dispenser systems (see reverse).

PEVASTAR easily removes medium to heavy soiling such as oils, fats, tar, bitumen, ink, etc.

PEVASTAR is extremely versatile and can be used in all areas of industry.

Composition

PEVASTAR is based on renewable raw materials that are dermatologically and toxicologically safe.

PEVASTAR contains a complex, synergetic surfactant system that removes soiling while being kind on the skin. High-grade natural fats enable effective refatting of the skin. The surfactants are biodegradable and fulfil the requirements of the OECD screening test.

PEVASTAR

Suitable for many dispenser systems

PEVASTAR contains high-grade, gentle synthetic abrasives that enhance the cleansing effect. These abrasives do not block waste pipes.

PEVASTAR is silicon-free.

PEVASTAR is pH-neutral.

PEVASTAR has been dermatologically tested.

PEVASTAR is proven due to many years' use in practical application.

Application

Rub *PEVASTAR* into the dirt and grease on the skin. Continue rubbing while adding a little water. Then rinse thoroughly.

A little *PEVASTAR* goes a long way. Approx. 3 ml (one dose from the dispenser) is sufficient to clean your hands thoroughly.

Skin cleansing

Heavy soiling

Product description

Light beige, fluid hand cleansing paste.
Contains PU abrasives.
pH-value: Approx. 6.2
Density: Approx. 0.89 g/cm³ (20° C)

Statutory requirements

PEVASTAR is subject to the German Cosmetics Ordinance (KVO) and the Foodstuffs and Commodities Act (LMBG). All cosmetics products in the **PEVA** range are manufactured in accordance with GMP (Good Manufacturing Practice) and are subject to microbial quality assurance check.

Storage information

PEVASTAR can be stored in closed original containers at room temperature for at least 30 months. The contents must be used within 12 months of the container being opened.

Skin care information

When working with noxious substances, a suitable skin protection agent should be applied before starting work (e.g. **PEVAPERIM** universal skin protection lotion). After finishing work, a suitable hand care agent should be rubbed into the skin regularly in order to aid regeneration (e.g. **PEVALIND** skin care lotion, rich in active ingredients).
